CONNECTION

## May 2018

### COMMUNITY VISION

Members of the Shackan Band envision a Healthy community that lives in accordance with Traditional Scw'exmx values. These values include sharing, helping, learning and teaching.

These values translate into helping the younger generation realize their potential, promoting everyone's involvement in the life of the Community, and also in being generous to those in need.

### MISSION STATEMENT

The band office is to promote the development of a healthy lifestyle and self-sufficiency for Shackan community members. We will achieve by being helpful, positive, respectful and professional to leadership, co-workers and Shackan members when administering band programs administering band programs.

## Emergency Management BC Submission: Flood and Debris Flow Preparedness

Flooding is a common, naturally-occurring event in B.C. Although it can happen at any time of year, the most severe floods typically occur in spring — known as freshet. Last year's wildfire activity may also increase the risk of natural landslides and flooding in your community. A severe wildfire damages the forest canopy, as well as the smaller plants and soil below the trees. This can result in increased runoff after intense rainfall or a rapid snowmelt, putting homes or other structures below the burned area at risk of localized floods and landslides. The risk could also increase if the rainfall follows a prolonged dry period, because water can't soak into fire-altered soils. Fortunately steps can be taken to be prepared!

### What specific hazards should you watch for?

**Flooding**, especially after an intense rainfall (i.e. 10mm of rain falling under 30 minutes) or rapid snowmelt.

**Landslides**, which could include rock slides or debris flows (fast-moving landslides resulting from heavy water runoff and carrying large amounts of soil and debris)

### What could be at risk?

**Residential homes, farms and structures** that reside in the floodplain or are downslope or downstream of the site of a wildfire.

**Infrastructure** such as roadways, railway lines, bridges, domestic water lines and other critical infrastructure may be obstructed, inundated, blocked or washed out.

### What should you do?

**Know your risks.** Pay attention to weather forecasts that include thunderstorm or heavy rainfall warnings. You can also monitor Flood and Freshet Conditions and Advisories by visiting the [River Forecast Centre](#) website.

**Prepare.** Flood waters move fast, so develop a [household plan](#), put together your [emergency kit](#) and [connect with your neighbours](#). Learn about the emergency response plan for your area. Download the [PreparedBC: Flood Information for Homeowners and Home Buyers guide](#) (PDF) to learn about protecting your home and property.

**Take action.** If you face a threatening flood situation, park vehicles away from streams and waterways, move electrical appliances to upper floors and make sure to anchor fuel supplies. Listen to local officials if you are asked to evacuate. Be safe and don't go down to watch the rushing water. If you notice trees beginning to lean or bend near your home, or cracks developing in the hillside, consult an engineer or contact local authorities. If you live near a waterway, a change in water colour or rapid change in water level (especially a drop) could indicate a problem upstream.

**Call** your local fire, police or public works department immediately if you suspect something out of the ordinary. You can also call Emergency Management BC at 1-800-663-3456.

# BE BEAR AWARE

If you manage the bear attractants around your house, worksite or campsite you can keep your family safe and keep bears from being destroyed. There are a number of things you can do:

1. Keep all garbage securely stored until collection day. Placing garbage at the curb before collection day is poor behaviour and often illegal if your community has garbage bylaws in place. Residents in communities that do not have curbside pick-up should keep refuse in a bear resistant container.
2. Manage your fruit trees and berry bushes responsibly. Pick all fruit as it ripens and ensure that windfalls do not accumulate.
3. Bird feeders often become bear feeders. Please – only feed birds during the winter months.
4. Feed pets indoors, or if fed outside, take in any feed that is not immediately eaten.
5. Keep your barbecue clean and free from odours. Burn off the grill every time after use and clean out the grease traps.
6. Manage your compost properly. Composts should have equal amounts of brown and green materials added to reduce odours.
7. If you keep chickens, bees or small livestock use a properly installed and maintained electric fence. Store all your feed in a secure location and ensure feeding areas are clean and free of attractants.

British Columbia Conservation Foundation

## BEAR SAFETY TIP

If you have a bear in your yard, slowly retreat into the house and ensure that the home is secure. Call the Conservation Officer Service reporting line (1-877-952-7277) to report any incidents. After the bear has left ensure that whatever attracted the bear is removed.

## HUMAN-BEAR CONFLICTS

Bears account for approximately 20,000 calls to the Conservation Officer Service reporting line every year.

Garbage is the number one bear attractant cited when reporting a call.

Relocation is seldom a solution for bears attracted to garbage. Individuals often return to their original territory or become "problem" animals in other communities. In addition, relocated wildlife often fail to adapt to their new habitat and, as a result, may starve to death or be killed by those animals that already occupy the area.

Bears that become highly food-conditioned and habituated to humans are often destroyed because of concerns for human safety.

Early reporting of a bear in a neighbourhood helps address underlying issues before the bear becomes habituated.

## 2018 Free Disposal Days and Hazardous Waste Round-Ups

Residents may bring **ONE FREE LOAD PER HOUSEHOLD** to their local Eco-Depot or Transfer Station on event day. One load is defined as a maximum of one 8 foot pick-up truck box OR one 8' foot trailer. Residents can save money on materials normally charged disposal fees for such as cooling appliances, tires on rim, mattresses, furniture, demolition/construction waste, wood waste, roofing shingles, and household garbage.

The free load on Free Disposal Day applies to residential customers only. Regular disposal fees apply for all business/commercial loads.

Schedule of Events

As an added service, sites that normally accept only bagged household garbage and recycling will also accept furniture, mattresses, scrap metal, tires on rim, and small loads of demolition/construction waste. Residents are reminded to **tarp and secure loads** before leaving home! Unsecured material is a hazard and fines can be issued for failing to secure loads. **As per Bylaw 2465, an unsecured load may be penalized with a fine of up to \$100.00 per incidence.**

### 2018 Household Hazardous Waste Round-Ups

Saturday, May 12	Saturday, June 2
Merritt - Civic Center Parking Lot	Kamloops - Mission Flats Landfill

Household Hazardous Waste (HHW) is material labeled, corrosive, poisonous, ignitable, or toxic. Examples include adhesives, paint thinners, chemicals, cleaners, mercury, antifreeze, herbicides, pesticides, paint, oils, and gasoline. This material should **NEVER** be put into the garbage. During the Household Hazardous Waste Round-Up, residents are welcome to bring these hard to dispose of items to the event nearest them for safe and environmentally friendly disposal. **This event is for residential waste only.** Business and commercial hazardous waste will not be accepted.
